This thesis, based on artistic experiments with material science laboratory tests, is an original contribution, as well as a practical source, to a more reliable foundation and a deeper understanding of paper-composite porcelain and its applicability within the field of ceramic art and design.

Art Monitor is a publication series from the Board for Artistic Research (NKU) of the Faculty of Fine and Applied Arts, Göteborg University, Sweden.

Joung-Ah Kim • Paper-Composite Porcelain

Characterisation of Material Properties and Workability from a Ceramic Art and Design Perspective
