Using Light to Regulate the Activity of RET Kinase

Design, Synthesis and Evaluation of Photoswitchable DFG-out RET Kinase Inhibitors

Yongjin Xu

Using Light to Regulate the Activity of RET Kinase | Yongjin Xu 2021

Yongjin Xu received a Master's degree of Science in Medicinal Chemistry from Sichuan University, China, in 2015. He began his dissertation in the Medicinal Chemistry group at University of Gothenburg in 2016. His PhD project focuses on design and development of photoswitchable DFG-out RET kinase inhibitors.
